Horse Fencing & Stalls

THUROBED MATTRESS SYSTEM BENEFITS

For the Horse

Ultimate Comfort: Provides unsurpassed comfort through a resilient stall surface which mimics natural turf. Horses on the Thurobed are encouraged to lie down to rest more often and for longer periods of time. While standing, this stall mat system provides a supportive, even surface. While lying down, this system decreases the time of injury rehabilitation and aids in loosening stiff joints. This system also provides insulation from the cold and a barrier against dampness from concrete floors. The equine performance industry reports less leg fatigue and a reduction in tissue fluid accumulation.

Non-Slip: Provides a non-slip surface, enabling safer and easier movement. In fact, many veterinary facilities are taking advantage of this benefit in their post-anesthetic stalls.

Air Quality: Research from the Equine Research Centre in Guelph, Ontario has found that using a fraction of the bedding with this system improves stable air quality without sacrificing horse comfort. Less bedding means less dust! In addition, the top cover is non-permeable. All waste in the stall is removed with shavings. No ammonia smell will be seeping in the ground surface.

Joints & Sores: This system is designed with a horse-friendly surface. The incidence of hock sores are drastically reduced and even completely eliminated with the use of the Thurobed Mattress System. The supportive, yet forgiving, characteristics of Thurobed have produced proven results in animals with joint problems.

Foaling: Excellent environment for foaling! Provides great footing for the active and energetic newborn, not to mention the easy clean up when the foaling is over.

For the Owner

Bedding: This system is equivalent to 4"-8" (10-15cm) of wood shavings which allows you to reduce bedding usage without sacrificing horse comfort.

Labor: Cut muck out time in half! Less bedding means less work and lower costs. The wall-to-wall installation of Thurobed Mattress System means dirty bedding stays on top where it can be easily removed. In many areas, disposing of your soiled bedding is very costly. This stall mat system can reduce your manure pile up to 65%, thereby putting money in your pocket.

Stall Maintenance: Because Thurobed Mattress System covers the entire floor, horses are unable to dig, thereby drastically reducing stall maintenance.
