

Interlocking Stall Mats

Non-Skid \ Heavy Duty \ Long Lasting \ Safe

Interlocking stall mats are cut from durable, 100% recycled revulcanized solid rubber. Our component design with interlocking mats means that you can build a floor of almost any size. Straight edges all along the outside and interlocking edges everywhere rubber touches rubber will provide a "shiftless" fit for your horse stalls. Interlocking mats will give you the appearance and performance of a one piece floor at a much lower cost and are easier to install. Each piece is precision cut for exact size, requires no adhesive

for installation and are easy to maintain. Interlocking stall mats prevent common problems that occur with straight edge mats such as pulling apart, moving around, or having to remove mats to clean underneath them. Install them one time and never have to worry about them again. Excellent for many different uses such as stalls, wash and grooming areas, farrier areas, treatment areas, barn aisles, and even trailer flooring. Can be used both inside and outside of the barn without any fear of dry rotting.

Features & Benefits

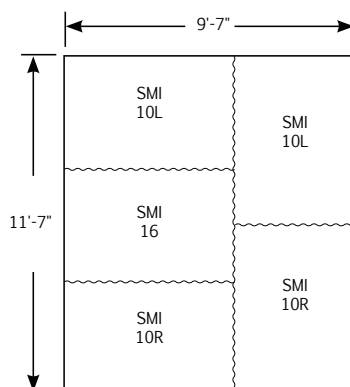

- Anti-Fatigue
- 10-Year Limited Warranty
- 100% Recycled Rubber
- Durable in All Weather Conditions
- 3/4" (17mm) Thick
- Non-Skid Punter Surface Design
- Reduces Animal Back and Leg Strain
- Reduces Bedding Coats
- Reduces Cleaning Costs and Time
- Heavy Duty, Long Lasting Durability
- Easy Installation
